

# Pedro Marco Achanccaray Diaz

---

Postdoctoral Researcher at IGP/TU Braunschweig

Ph.D. and M.Sc. in Electrical Engineering, with focus on digital image processing of satellite imagery, from Pontifical Catholic University of Rio de Janeiro (PUC-Rio) in 2019 and 2014, respectively. Graduated in Mechanical and Electrical Engineering at the National University of Engineering (UNI) in 2010. I have a vast experience in research projects in the areas of machine learning, deep learning, computer vision and remote sensing applied to the areas of agriculture, oil & gas, and construction heritage preservation.

Contact Information	Bienroder Weg 81, Room 012 Institute of Geodesy and Photogrammetry – IGP Technical University of Braunschweig – TU BS Braunschweig, Germany	+49 151 5539 4325 p.diaz@tu-braunschweig.de  pedro9589
---------------------	--	---

Research Interests	Computer vision, Machine learning, Deep learning, Remote sensing
--------------------	--

Education	<b>Pontifical Catholic University of Rio de Janeiro (PUC-Rio)</b> Ph.D. in Electrical Engineering, 2019
-----------	--

	<b>Pontifical Catholic University of Rio de Janeiro (PUC-Rio)</b> M.Sc. in Electrical Engineering, 2014
--	--

	<b>National University of Engineering (UNI)</b> B.Sc. in Mechanical-Electrical Engineering, 2010
--	---

Achievements, Honors and Awards	<ul style="list-style-type: none"><li>• Scholarship <i>Science without Borders</i> from CAPES, for visiting researcher at IPI, LUH (Germany) 2016</li><li>• Scholarship from CNPq for the Ph.D. program at PUC-Rio 2014-2018</li><li>• Scholarship <i>Bolsa Nota 10</i> from FAPERJ 2013</li><li>• Scholarship from CAPES for the M.Sc. program at PUC-Rio 2012</li></ul>
---------------------------------	---

Professional/ Research Experience	<b><u>Mass monument industrial hall – C3</u></b> 2021-2024 <i>Researcher</i> Research focus on the development of methodologies to find system halls of the High Modernism period using aerial imagery and deep learning methods for semantic segmentation. The project belongs to the priority program SPP2255 from the “Deutsche Forschungsgemeinschaft” (DFG).
-----------------------------------	---

	<b>MANNTIS – Semantic Segmentation of Subsea Images using Deep Learning</b> 2020-2021 <i>Researcher/ Developer</i> Development of deep learning methods for object detection and image classification from ROV photos/videos. The project’s goal is to automatically detect objects/events that may influence/affect equipment, pipelines, or a reservoir’s surrounding ecosystem.
--	--

	<b>BIG-OIL – Data Science for the Oil &amp; Gas Industry</b> 2019-2021 <i>Researcher/ Developer</i> Development of methods for semantic segmentation, object detection and image classification from images/videos using deep learning. The project’s goal is to detect objects/events in the sea (from ROV videos), sea surface (from SAR images)
--	--

and sea floor (from seismic data). These objects/events are related to the tasks of exploration, extraction, and monitoring in the Oil & Gas industry.

2015-2017

**Campo Verde / LEM**

2017-2018

*Researcher*

Development of public benchmarks for agricultural applications. My activities involved the pre-processing of sequences of multitemporal Sentinel-1 (SAR) images for agricultural monitoring in two municipalities in Brazil: Campo Verde and Luis Eduardo Magalhães (LEM). These projects were in cooperation with the National Institute for Space Research – INPE. LEM received financial support from the ISPRS Scientific Initiatives.

Teaching Experience	Deep Learning for Social Sciences and Public Administration (PUCP), <i>Professor – Specialization course</i>	July 2022
	Deep Learning (IGP/TU BS), <i>Teaching assistant – Master program</i>	Apr – July 2022
	Machine Learning for Social Sciences (PUCP), <i>Professor – Specialization course</i>	Jan – Feb 2021
Invited Talks	<ul style="list-style-type: none"> <li>• <i>Interpretando el mundo a través de imágenes y deep learning</i>, XI Electronic Week International Conference, 2022.</li> <li>• <i>Desafíos del aprendizaje profundo en la visión por computador: Introducción al aprendizaje profundo y aplicaciones en teledetección</i>, V International Conference on Systems Engineering, 2022.</li> <li>• <i>Deep Learning</i>, Summer School – IBT TU Braunschweig, 2022.</li> <li>• <i>Aplicaciones de Deep Learning en Procesamiento Digital de Imágenes: desde el fondo del océano hasta el espacio exterior</i>, Capítulo de Ingeniería Electrónica CIP Cusco, 2022.</li> <li>• <i>Segmentación de tipos de cultivos agrícolas con herramientas de machine learning e imágenes de teledetección</i>, Pontificia Universidad Católica del Perú PUCP, 2021.</li> <li>• <i>Reconocimiento de cultivos agrícolas en regiones tropicales usando secuencias de imágenes de teledetección de sensores activos y pasivos</i>, International Conference on Computer Systems and Sciences, 2020.</li> </ul>	
Key Skills and Experience	<p><i>Programming:</i> Python, MATLAB, C++, C#, Java, R, Bash Script</p> <p><i>Frameworks:</i> TensorFlow, Keras, PyTorch</p> <p><i>Version Control:</i> Git, GitLab, GitHub</p> <p><i>Containerization Tools:</i> Docker, Singularity</p> <p><i>Software:</i> QGIS, ESA SNAP, MS Office</p>
